Magna Industries, Inc. Announces the Addition of MAP-Pro™ Premium Hand Torch Fuel
MAP-Pro™ premium hand torch fuel replaces MAPP® gas

CLEVELAND, OHIO, FEBRUARY 22, 2008: MagTorch®, Magna Industries, Inc.'s brand of hand torches and accessories for the hardware industry, has announced that they will be carrying MAP-Pro™ gas as a new premium high temperature gas for their hand torches.

The move to MAP-Pro™ is precipitated by the announcement from Magna's supplier that the petrochemical company, Pétromont and Company, responsible for the sole manufacturing of MAPP® gas will be suspending their operations indefinitely on April 30, 2008. Magna plans on moving from selling MAPP® gas to the new MAP-Pro™ gas sometime in early March of 2008.

Map-Pro™ is a new higher temperature fuel that has greater combustion intensity as well as a greater flame temperature when compared to propane gas. "Magna is proud to be one of the first torch manufacturers to announce that we fully support the new MAP-Pro™ gas," said Larry Whited, president of Magna Industries, Inc. "I am pleased that we have been able to closely work with our fuel supplier and that our team's strategic planning will allow us to continue our high level of fulfillment to our customers even during this unforeseeable supply chain disruption."

Magna Industries, Inc. is an industry leading manufacturer of hand torches for the hardware industry and is headquartered in Cleveland, Ohio. Magna has been under the leadership of Larry Whited since it was founded in 1979. The MagTorch division is the largest of Magna's three active companies. Magna also operates Sand&Kleen® and Insto Impala Products, Inc. For additional information about MagTorch visit www.magtorch.com. For a direct link to updated details concerning MAP-Pro™ gas please visit www.map-progas.com.

MAPP® is a registered trademark of B.O.C. Group Inc.
MAP-Pro™ is a trademark of Worthington Cylinders, A Worthington Industries Company
